

12.7 x 108 mm, M87 TANK

Machine gun

Machine Gun M87 TANK version is formed when the Machine Gun M87 is set to rotating base. Rotating base can easily and quickly change elevation through elevation mechanisms and springs. Chosen position is fixed by a stop on the elevation device. This mount is assembled to tanks or light armoured vehicles. Primary function of M87 TANK VERSION is provision of efficient fire against water-surface and costal targets.
