

WINTER SNIPER CAMOUFLAGE (GILLY SUIT)

It provides excellent camouflage of the whole body as well as personal armament. It is worn over battle uniform and allows high mobility in any field conditions. Sniper set consists of a poncho (pelerine), sleeves and gloves, stockings, helmet cover, a hood and scarf and camouflage stripes for personal armament. It is designed in a way that it appears as a part of natural environment. Basic part of this camouflage suit is synthetic mesh which is upgraded with trimmings of characteristic colors that are made of an impregnated cloth or of synthetic mesh. It is suitable against detection by naked eye and all types of observation and aiming devices (optical and optoelectronic devices) in visible and UV part of the EM spectrum at close ranges (even closer than 10m). Sniper Camouflage is produced in one universal size that can be adjusted thanks to the special design of this suit. The Sniper Camouflage Suit comes packed in suitable transport bag. Total mass of the camouflage suit, depending on the trimming material (synthetic mesh / impregnated cloth) is 3.8 kg or 5.1 kg.
