

ANTI-RIOT HELMET

The anti-riot helmet provides full coverage of the user's head. It is designed to protect the head against mechanical impacts coming from rocks, bottles and other throwing objects, as well as against chemicals and liquids that are often used during riots. Helmet shell is made of polycarbonate that is self-extinguishing and is resistant to organic and inorganic acids, water, oils, neutral and other salts.

The helmet consists of:

- Polycarbonate shell
- Styrofoam
- Suspension/retention system
- Polycarbonate visor
- Visor attaching elements
- Neck protector

In addition, the helmet has excellent mechanical characteristics in wide temperature range, from -30°C to +50°C. The detachable neck protector is made of different types of foam embedded in fine leather. Base part of the adjustable suspension/ retention system is made of quality leather and synthetic mesh. The visor is 3mm thick and features transparency of 85% and it is resistant to weather conditions.

Standard colors: black, white, blue
