

ATU BACKPACK

Backpack is constructed of durable synthetic fabric with protective coating. It is intended for carrying combat equipment. Its design provides even weight distribution. Total volume is around 120 l. Side cargo pouches are detachable and can be used independently. They have volume of 7.5l each. Volume of the main compartment is 85l and it has detachable cover with volume of 5l. On the main compartment there is a pocket for placing rifle. Cover, front and side pouches are closing by means of zippers. They also have synthetic draw-strings for size adjustment. Inside the front pouch there is additional zippered opening for easy access to the main compartment. On the lower part of the main compartment there is a separate space that is closing with zipper and also can be accessed from the outside. Pouches and the main compartment are additionally secured with synthetic compression straps. On the front side of the backpack there is a heavy duty carry/drag handle. Adjustable padded shoulder straps and chest straps. Adjustable padded waist belt with triple retention plastic buckle. Stiffened and padded back panel. Upon request, backpack can be equipped with waterproof covering.

Color: camouflage, green, blue and black
