

BALLISTIC BLANKET

Ballistic blanket is made of high quality materials. Its purpose is wide, but it is mainly designed for VIP or individual protection. It can be used in critical situations, for example it can be held in front of windows, doors or vehicles in order to protect against explosive, bullets etc.

The ballistic material of the protective blankets is self-extinguishing and it is resistant against ammunition and fragments of high velocity, with $V50 > 500\text{m/s}$ as per STANAG 2920. Ballistic blanket is packed in separate bag. Bag is made of waterproof, high strength material.

LEVEL OF PROTECTION IIIA ACCORDING TO NIJ 0101.04 STANDARD

	NIJ STD 0101.04	Bullet Type	Max. velocity	
			Fps	mps
CLASS IIIA	Protect against all Class I, Class IIA, Class II as well as all ammunition listed. Meets and exceeds NIJ STD 0101.04 for Type IIIA Armor including Back face Deformation (Blunt Trauma)	44 magnum 240 Bullet (15,5g) SJHP	1450	441
		9mm 124 Bullet (8,0g) FMJRN	1450	441
