

# BALLISTIC PLATE LEVEL III

The ballistic plate protection Level III provides protection regarding NIJ standard 0101.04.

The external layer is made of fabric. This plate is shaped to provide a comfortable fit on the front and back.

Ballistic plate Level III plate provides protection against all types of common grain rifle ammunition, including 7,9 mm caliber. Also, protects of ammunition listed in the table below.

The table below lists the ballistic protection factors of the plates with respect to various types of ammunition within defined velocities.

Weight: weight scale with plate dimensions and goes around  $\leq 1450$  g

Plate dimensions: 150x150 mm, 150x200mm, 250x300 mm, 250x330 mm, 280x350 mm

## BALLISTIC DATA:

Bullet type	Maximum velocity (m/s)
7,62 Nato Ball 150 Grain M-80 FMJ	853
7,62 Nato Ball Grain M-80 (steel jacketed)	853
.30 Carabine 110 Grain FMJ	595
12 Gauge Rifled Slug	473
7,62 x 39 Ball	732
