

PROTECTOR

Ballistic vest

Ballistic vest, model „PROTECTOR“ is made of nylon 6.6 fabric as material of carriers, and Aramid ballistic inserted panel (DuPont– Kevlar). Due to the high strength, light weight, soft , flexible and comfortable Aramid, the injury to human body is smaller after a bullet shot.

The design, color, fabric of carrier, size of the body armor can be customized according to customer needs and applications.

Panels for Ballistic vest „PROTECTOR“ has been tested in the Germany by Beschussamt Mellrichstadt lab testing.
