

BIG BLOCK

Ballistic shield is intended for special units. It protects the user against rifle ammunition - regular grain conclusive with caliber 7.9mm. There is a handle on the inner side of the shield. We produce two types of ballistic shields: with or without the ballistic glass - visor.

Big block shield can be disassembled thus enabling the upper plate to be used independently as Hand block.

TECHNICAL CHARACTERISTICS:

- Shield protection level as per the NIJ STD 0101.04 III
- Visor protection level as per the NIJ STD 0101.04 III
- Visor opening 200 x 100 mm
- Ballistic part mass (maximum) 19 kg/m²
- Dimensions 1600 x 850 mm
- Color black
