

DEMINING SUIT MD-06

DEMINING SUIT MD-06 is made to protect the user work-ing in minefields or with explosive devices against dangers that arise from possible detonations, such as high velocity fragments, high pressure and intense heat.

DEMINING SUIT MD-06 consists of following parts:

- Protective hoses and sleeves
- Protective vest
- Belt with shoulder straps
- Helmet with visor M-97A
- Transportation bag
- Hand and foot protection

Total weight of demining suit for standard performance is 21 kg. Various colors and design are available. The front and back of the vest have pockets for inserting hard ballistic plates in order to increase protection level up to level III or IV (NIJ STD 0101.04.) There are four smaller pockets on the front of the vest for placing neces-sary equipment. Available sizes: L, XL, XXL
