

OCL-N

Laser target designator

OCL-N enables fast and precise sight. It's very efficient item mounted on the Picatinny rail for automatic rifle AK-47 in invisible spectrum.

Technical characteristics :

- Supply voltage lithium battery 3 V, CR 123
- Power consumption < 60 mA
- Light source wavelength visible 650 nm
- Laser output light power < 5 mW
- Average of adjustment
by horizontal and vertical +1m at 100 m
- Laser beam divergence 1 mrad (Ø100 mm at 100 m)
- Visibility in night conditions > 200 m by naked eye
- Waterproof 2 m under water
- Weight with battery and mount 145g
- Operating temperature range -20°C to +55°C
- Mountage on the Picatinny rail (MIL-STD 1913) or
on a gun tube
