

MODULAR BACKPACKS

Modular backpacks are produced using high-quality, synthetic, abrasion resistant material. Its design provides even weight distribution. Our Modular backpack consists of two parts: Transport backpack and combat backpack where each of them can be used independently. Both packs have adjustable padded shoulder straps and drag/carry handles, as well as adjustable webbing straps for carrying sleepingbag, sleeping pad or tent.

Transport backpacks:

The transport backpack consists of the main chamber with cover and two side cargo pockets with flaps. There is enough space left between those pockets and the backpack sides for placing the rifle. On the rear outer side of the cover there is a zippered pocket. There are also adjustable chest straps and waist belt with plastic buckles.

- Dimensions: 750mm x 600mm x 220mm
- Volume: 60 L (with pockets)

Combat backpacks:

Combat backpacks consists of main chamber with zippered cover and two detachable holsters with metal buckles. It also has adjustable chest straps with plastic buckle.

- Volume is approximately 25 liters.
- Color: camouflage, green, blue and black
