

RIS x4

Night vision weapon sight

RIS x4 is a single tube x4 magnification night vision weapon sight. It can be used as night weapon sight for medium to long ranges, or for surveillance. RIS x4 can be used individually or in combination with other devices.

Lightweight, ridged and well balanced, RIS x4 incorporates illuminated reticle with windage and elevation adjustments.

Body of RIS x4 is made of highly resistant aluminum alloy and can withstand extreme environmental influence during everyday use.

Specially designed optical system makes RIS x4 compatible with all laser types.

• Magnification	x4
• Filed of view	9°
• Target detection	550 m
• Target recognition	400 m
• Focus range	25 m to ∞
• Eyepiece focus	±3 Dptr
• Exit pupil	8 mm
• Eye relief	50 mm
• Reticle adjustment	± 0-24 (23,5 mrad)
• One click on 100 m distance	1' (0-00,3); 3 cm
• Image intensifier	HD 2100/HD 1520
• Input voltage	3 VDC
• Power supply	2 AA(1,5V)
• Voltage reversal protection	Protected
• Switch	ON/OFF
• Battery life	min 40 hours (20°C)
• Weight	1,5 kg
• Length/Width/Height	243x94x100 mm
• Mounting	Picatinny rail
• Operating temperature	-30°C to +55°C
• Storage temperature	-40°C to +68°C
• Immersion	30 min for 1 m
