

12.7 x 108 mm, M87 NAVAL Machine gun

Machine Gun M87 NAVAL version is formed when the tank version of machine gun M87 is assembled to the bell-shaped mount. The machine gun M87 NAVAL can be fixed to a boat or a vehicle by connecting the mount to the foundation with screws. Primary function of M87 Naval is provision of efficient fire against watersurface and costal targets. Depending on the type of mount, together with the weapon, accessories for the mount are delivered. At customer's request, described versions of machine guns can be assembled to other transport means.
