

L-80-07

Helicopter rocket launcher

The seven-tube launcher L-80-07 performs individual launches of unguided rockets S-8KOM 80 mm from a helicopter equipped with a “single-channel” electrical installation and devices for launching unguided rockets.

Technical characteristics:

This seven-tube launcher is intended for use on the following helicopters: Airbus H-145M, Mi-17, SA-342 “Gazela”. It is compatible with MIL-STD-1760 digital architecture which allows easy integration on modern combat platforms.

The hardpoints for mounting the launcher comply with both NATO and Russian (ГoCт) standards. The rockets are launched from launch tubes (with open rear ends), and they are placed in the form of a honeycomb rocket package.

- Overall dimensions: 1715 x Ø336.
- Caliber: 80mm
- Number of launch tubes: 7
- Rocket type: S-8KOM
- Integration with Airbus software
