

LLU 7x57

Rocket launcher

The LLU 7x57 launcher is seven-barrel launcher which fires 57mm caliber missiles to destroy targets in the air and on the ground, as a weapon of a modern airplane and is installed on helicopters and planes.

This launcher is used to launch BR-1-57, BR-2-57 and S-5M missiles (destructive missile, cumulative missile, partially-cumulative missile).

The rockets are launched from launch barrels, which are positioned in the form of a honeycomb structure rocket package.

- Overall dimensions: 1070 x ø230
