

MRB, cal. 12/70, cal. 12/76

Special purpose ammunition

Modified version of ammunition intended for obstacles penetration and breaking of locks and hinges on wooden doors. It penetrates 3 mm thick steel sheet and 100 mm thick pine beam. Assembling of this ammunition enables careless use in semi-automatic weapons with no risk for gas openings clogging.

SOUND EFFECT, cal. 12/70

The bullet is intended to cause a shock effect, since it generates noise from 100 to 130 dB measured at 10 m from the barrel muzzle.
