

ANTI RIOT SUIT

Anti-riot gear is intended for special police forces and anti-riot squads. Its surface protects the body from blows with blunt objects (sticks, stones, etc.) stings and sharp objects from the effects of harmful organic and inorganic chemicals. It does not protect from sharp objects as dagger or crossbow e.t.c.

- Maximum protection
- Reinforced vulnerable body parts protectors
- Full range of motion
- Lightweight and durable

BODY PROTECTION

Protection of the torso, shoulder and groin parts. Highly comfortable vest padded with 3D mesh. Plastic snaps for connection of arm and leg protectors allow unobscured body motion and secure all gear in place. The set also include attachable protectors for hips and thighs.

ARM PROTECTION

Heavy-duty reinforced foam padded nylon or polyester inner arm support. Enhanced comfort with additional shock absorber inside of protectors. Elastic straps adjustable to user for perfect gear fit.

LEG PROTECTION

Heavy-duty reinforced foam padded nylon or polyester inner leg support. Increased reliability with additional connectivity for footwear by wire. Elastic straps adjustable to user for perfect gear fit.

It is made from a combination of soft material and hard plastic material. Soft materials have anti-trauma property whose role is to alleviate the intensity of shocks (3D mesh, polyethylene foam). They provide the necessary protection and comfort of the body, while the hard parts are made of ABS material designed to endure heavy blows, evenly distributed impact strength, reducing their intensity and also prevents the penetration of sharp objects to the body.

All parts of the anti-riot suit are anatomically shaped, adjustable, reliable, flexible and mutually compatible, allowing users unrestricted mobility.
