

BG-PUD 23 HE WARHEAD

TECHNICAL DATA :

- Mass 23,5 kg (explosive 9,6 kg)
- Dimensions 427x272x82 mm (without a fuze)
- Fragments type Cubes made of hard metal; 4.452 fragments
- Explosive Hexolite 60 /40
- Fuze Electro-mechanical fuze of impact and directed action, UET M25
- Target area A 30 m diameter circle on the ground below BLV which is at a height of 50 m from the ground
- Required density of action Three hits per m²
- Required efficiency Of steel sheet, T/K, minimum thickness of 4 mm
- VO efficient fragments Min. 1,7 km/s (outside the target zone min. 1, 18 km/s), max. 1,9 km/s
- Energy of fragments on target 450 J, 600 J

Note: all data are approximate, confidential and instructive.
